

Dough Assist Basic

Universal DOUGH DIVIDER designed and produced by **Benier**

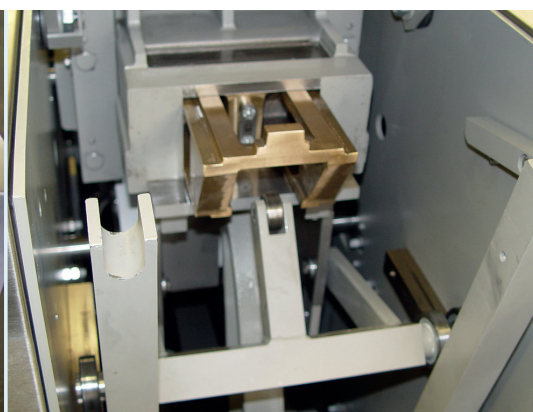

The Dough Assist Basic is a universal, single pocket divider that is suitable for a wide range of dough processes. The Dough Assist Basic is durable, dough friendly, hygienic and ergonomic in use.

Because of the adjustable suction-volume and the regressive springs for the suction-piston and knife the dough is divided very gently and very accurately.

As standard the Dough Assist Basic comes with a frequency controlled drive, full stainless steel exterior, Teflonized® hopper and hopper foot, integrated electrical cabinet and oil reservoir.

Heart of the divider

Dividing piston

Mechanical stroke counter

TAKE CONTROL OF YOUR DOUGH

Features

High performance

- Teflonised stainless steel 60 litre hopper
- Single pocket Nickel resistant mechanism
- Crankshaft driven movements with a frequency controlled variable speed drive
- Integrated oil tank (stainless steel) including gauge and minimum oil level sensor with acoustic signal
- Mechanical stroke counter

Easy to operate

- Adjustable suction volume
- Manual weight adjustment
- Long side leading outfeed of dough pieces

Easy to clean and maintain

- Mounted on wheels so you can easily roll the machine away for cleaning or maintenance
- Knife, main piston and dividing piston are easy to remove for cleaning

Safety

- Emergency stop on operator panel
- Safety ring on hopper

Specifications Dough Assist Basic

Model	Pockets	Weight range (gr.)		Capacity (pc/hr)*	
		Min.	Max.	Min.	Max.
DAB-B	1	210	1.020	375	1.500
DAB-C	1	325	1.750	375	1.500

* Capacity is related to dough consistency, required dividing accuracy, weight of the dough piece and the required final structure of the end product
